Docket No · P0850 70005US01

(PATENT)

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Kristen Briggs et al.

Serial No.: 10/536,875

Confirmation No.: 6405

Filed: December 1, 2006

For: PLANT PRODUCTION OF IMMUNOGLOBULINS WITH

REDUCED FUCOSYLATION

Examiner: C.K. Worley

Art Unit: 1638

Certificate of Electronic Filing Under 37 CFR 1.8

I hereby certify that this paper (along with any paper referred to as being attached of system in accordance with § 1.6(a)(4). ed) is being transmitted via the Office electronic filing

Dated: May 29, 2009

RESPONSE TO RESTRICTION REQUIREMENT

Mail Stop Amendment Commissioner for Patents P.O. Box 1450

Alexandria, VA 22313-1450

Dear Sir:

In response to the Species Election Requirement mailed April 29, 2009, Applicant hereby elects the anti-herpes simplex virus antibody without traverse, but traverses the requirement to elect 3Man OR 2GlcNAc OR 1Xvl.

For the species election between the anti-herpes simplex virus antibody and the anti-dual integrin antibody. Applicant elects the anti-herpes simplex virus antibody.

The elected claims readable upon the elected species include claims 1-18, 21-29, 38-53, and 75-76.

For the election between 3Man and 2GlcNAc and 1Xvl Applicant submits that this is not an appropriate species restriction. 3Man, 2GlcNAc, and 1Xyl are all elements of a single glycan and thus it is not appropriate to elect one independent of the others as it would result in a partial glycan.
